The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-30,37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raisky in view of Cho.

The previous rejection still applies. The new limitations are not patentable as Raisky teaches quantum wells of the same thickness and barriers of the same thickness. The new claim merely recites III-V materials and does not distinguish over the applied art.

Applicant's arguments filed 7/20/05 have been fully considered but they are not persuasive. Applicant argues that the intrinsic MQW region would look like Cho's intrinsic region rather than the suggested intrinsic MQW of Cho with Raisky. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). The Raisky with Cho suggested MQW comprises quantum wells of same thickness (Raisky) and GaN based material (Cho). Arguing against Cho alone is unconvincing of patentability.

Likewise, arguments regarding physical incorporation of Cho's well structure into Raisky is unconvincing of patentability. The test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the

Art Unit: 2815

references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981). Cho suggests GaN material for its increased conduction band offset and response at more desirable wavelengths. Raisky suggests same MQW quantum well widths for excellent photovoltaic operation.

Together the references suggest applicant's broadly claimed structures.

Claims 31-36 are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
